

## POSTER INDEX

Number	Firstname	Surname	Title
P1	María	Asensio	KINETICS OF THE H-ABSTRACTION REACTION FROM HYDROFLUOROETHERS BY CHLORINE ATOMS IN THE ATMOSPHERE.
P2	Otger	Crehuet Viladelbosch	Conformational study of the synthetic repellents DEET and Picaridin to improve structure-based design of novel mosquito repellents.
P3	Charlotte	Cummings	The microwave spectra, structure and internal rotation of the methyl group in the monohydrate complex of 2-methylthiazole.
P4	Barbara	Golec	Hydrogen bond properties of constitutional isomers of porphyrin and their derivatives.
P5	Yuta	Hori	Hydrogen bond structures and dynamics in proton-conducting imidazolium hydrogen succinate.
P6	Marcos	Juanes	Photochemistry and spectroscopy of metal ions: IR and Vis photodissociation spectroscopy of hydrated Fe ions.
P7	Dmytro	Mihrin	Highly Localized Water Librational Motion as a Sensitive Far-Infrared Spectroscopic Probe for the Micro-Solvation of Organic Molecules.
P8	Takumi	Nakanishi	Development of Iron(II) Complexes Exhibiting Thermo- and Photo-induced Proton Transfer Coupled Spin Transition.
P9	Rodolphe	Pollet	Ab initio simulations of the hydration of organic compounds relevant to atmospheric aerosols.
P10	Akshay Kumar	Sahu	Carbon-Centered Hydrogen Bonds In Proteins.
P11	Rizalina Tama	Saragi	CO <sub>2</sub> and H <sub>2</sub> O Activation on Niobium Oxide in the Gas Phase.
P12	Rizalina Tama	Saragi	Microsolvation of chiral molecules: 1-phenethyl alcohol and 1-phenethyl mercaptan.
P13	Anna	Stefaniuk	Isotope effect in solute-solvent interactions.
P14	Emil	Vogt	Interpreting Jet-Cooled Infrared Spectra of Water Dimer.
P15	Charlotte	Zimmermann	A balancing act: Dispersion interactions driving small ketone balance systems.
